9. (currently amended) The Web Server computer of claim 7, further comprising:

(d) at least one database including information regarding Web Sites available over the network each providing a resource configured to communicate with the API ~~the common interface~~; and

(e) means for enabling a client computer to search the at least one database.

10. (original) The Web server computer of claim 9, wherein the at least one database further includes information regarding devices that are represented by at least some of the Web resources.

11. (canceled)

12. (currently amended) The Web Server computer of claim 9, further comprising:

(f) means for dynamically discovering Web Sites connected to the network that provide a Web resource configured to communicate with the API ~~common interface~~; and

(g) means for adding information regarding the dynamically discovered Web Sites to the at least one database.

13. (currently amended) The Web Server computer of claim 7, wherein the Web page includes an advertisement regarding at least one Web resource configured to access the user's personal repository through the API ~~communicate with the common interface~~.

14. (currently amended) The Web server computer of claim 7, further comprising:

(a) means for generating the Web page based upon at least one characteristic of a job document stored in the user's personal repository ~~the user's job document~~.

15. (currently amended) A method, comprising:

(a) providing at least one server computer in communication with a network;

(b) the at least one server computer receiving a request from a client computer over the network, where the client computer is operable by a user that has a personal repository for storing the user's job documents and where the client computer includes an API for accessing the personal repository;

(c) the at least one server computer responding to the request by transmitting at least one portal Web page to the client, the Web page including information regarding a plurality of different Web resources that are available over the network; and wherein each of the Web resources configured to make use of the API in order to access the personal repository when the user is actively making use of the resource ~~a common interface in order to access a user's pre-selected document when the user is actively making use of the resource~~.

16. canceled

17. (currently amended) The method of claim 15, wherein the Web page further includes an advertisement of at least one service provided by a resource configured to access the personal repository through the API ~~make use of the common interface~~.
